FOREWORD

The Canada Grain Act provides that no railway company or vessel shall receive any western grain from any elevator or discharge any such grain into any elevator unless such elevator is licensed by the Board of Grain Commissioners. The Act also specifies the conditions by which grain dealers, track buyers or grain commission merchants must be licensed in order to engage in contracts dealing with western grain by grade name. Such elevator and dealers' licences are issued by the Board through the Licensing Division of the Statistics Branch. This office also supervises the implementation of Section 79-3 by which all such licensees must be secured by bond or otherwise for the performance of all obligations imposed upon them by the Act.

The Act sets up certain requirements which, either by themselves or by subsequent development through Board regulations, orders and administrative action, determine the location, structure, equipment and operation of the elevators and operators and the terms of reference of the dealers. These various requirements are summarized in Appendix 1 of this publication

EXPLANATORY NOTES

All elevators listed herein, unless marked with an "X", are licensed for the crop year 1960-61 as at August 1, 1960.

The storage capacity figures shown against each individual elevator include the elevator proper and all annexes operated in conjunction therewith that are located on the railway right-of-way as registered with the Board of Grain Commissioners for Canada.

The managers of certain elevator buildings which cannot be licensed as elevators on account of faulty receiving scales have been granted authority to operate them as Grain Storage Buildings annexed to specific licensed elevators. These buildings, however, are listed herein as unlicensed elevators as they can not be used for the purpose of receiving producers' grain delivered in truck or wagon-load lots; they are indicated by the sign "XG".

In this publication "Eastern Division" means all that portion of Canada lying east of the meridian passing through the eastern boundary of the city of Port Arthur, and "Western Division" means all that portion of Canada lying west of the same meridian.

Grain Storage Buildings are premises, other than licensed Country Elevators or Annexes, that have been authorized for the storage of grain.

TABLE 12A

SUMMARY OF SUPPLEMENTARY STORAGE SPACE
ANNEXED TO LICENSED PUBLIC COUNTRY ELEVATORS
 AS AT AUGUST 1, 1960.

Grain Storage Buildings are structures which can not be licensed as country elevators but are authorized for use as supplementary storage to licensed country elevators. They are operated by the managers of licensed public country elevators only and are located on and off railway sites at varying distances from the elevator proper. They are not grain elevators and can not receive grain directly from producers.

As these buildings are being used only temporarily, the supplementary storage figures shown hereunder have not been included elsewhere in this publication except in the final summaries.

APPENDIX 1

SUMMARY OF REQUIREMENTS FOR LICENCE

"Elevator" under the Act, means any premises into which western grain may be received, or out of which it may be discharged, directly from or into railway cars or vessels, and, notwithstanding anything contained in any other general or special Act, includes any such premises owned or operated by Her Majesty, either directly or through any individual, public body or company.

In compliance with the definition above and excluding those specially provided for by the Board, all elevators must be on track in the Western or Eastern Divisions. Private country elevator licences may not be issued to a firm at a point where there is no public country elevator. Track Buyers, Commission Merchants and Grain Dealers may operate only in the Western Division.

Elevator structures must conform to the requirements of the railway serving them and to the requirements of the companies insuring elevators and contents against fire and inherent explosion. They must provide proper facilities for the safe storage and handling of grain and plans for construction, reconstruction or additions must be approved by the Board.

The Board requires that elevator equipment such as scales, dockage and moisture testers, cleaners, dryers, conveyors, etc., be installed as considered necessary. Private country and mill elevators do not come under this provision. Facilities at Eastern elevators are subject to inspection at any time by an inspecting officer of the Board.

The financial standing of all licensees must be sound in order that the applicant for licence may be able to obtain the required bond and insurance coverage.

Stocks of grain in store at public country elevators must be fully covered against loss by fire at all times, while semi-public terminal and eastern elevators must be fully covered at all times against loss by inherent explosion as well as fire through insurance companies registered to do business in Canada.

All licensees, excepting eastern elevators and all elevators in British Columbia outside the Peace River district, must deduct the 1% levy from the purchase price of grain delivered to them by producers under the terms of the Prairie Farm Assistance Act.

The sections following show further details of requirements by class of licence:
